

Frost Scholarship Programme (Israel)

The Frost Scholarship Programme (Israel) funds current students of Israeli universities to study one-year, full-time master's courses in science, technology, engineering and mathematics ('STEM' subjects) at the University of Oxford.

The Programme is supported by the generosity of the Phillip and Patricia Frost Philanthropic Foundation. The first Frost scholars from Israel began their studies in October 2015, joining a cohort of Frost scholars from Florida.

The Frost Scholarship Programme (Israel) will continue to offer four scholarships each year until 2019.

Frost scholars will take part in an exclusive week-long orientation programme at one of Oxford's oldest colleges, Exeter College, to introduce them to academic life at Oxford just before the start of their course.

The scholarship will cover 100% of University and college fees and a grant for living costs (of at least £14,553). Awards are made for the full duration of your fee liability for the agreed course.

You must be applying to start a new master's course at Oxford. The following courses are eligible:

MSc Archaeological Science

MSt Archaeological Science

MSc Biodiversity, Conservation & Management

MSc Clinical Embryology

MSc Computer Science

MSc Environmental Change & Management

MSc Global Health Science and Epidemiology

MSc History of Science, Medicine & Technology

MSc Integrated Immunology

MSc Mathematical & Computational Finance

MSc Mathematical Modelling & Scientific Computing

MSc Mathematical Sciences

MSc Mathematical and Theoretical Physics

MSc Mathematics & Foundations of Computer Science

MSc Medical Anthropology

MSc Nature, Society & Environmental Governance

MSc Neuroscience

MSc Pharmacology

MSt Philosophy of Physics

MSc Psychological Research

MSc Radiation Biology

MSc Social Data Science

MSc Statistical Science

MSc Theoretical and Computational Chemistry

MSc Water Science, Policy & Management

Eligibility:

You must be a current student of an Israeli university, and have not previously been enrolled on a full degree programme at an institution outside of Israel. You must also be ordinarily resident in Israel.

Scholarships will be awarded on the basis of academic merit. In selecting the annual cohort of scholars, priority will be given to applicants in order to fulfil the aim of representing a range of subject areas.

This scholarship is not open to applications from candidates who hold deferred offers to start in 2018-19.

There is no separate application process for this scholarship: in order to be considered, you are recommended to submit your application for graduate study by the relevant January deadline for your course. Applications by the January deadlines will be prioritised. See the courses page for the deadline applicable to your course.

We will use the details you insert in the 'Nationality and ordinary residence' section of the graduate application form to assess your country of ordinary residence. For a definition of ordinary residence and further details on how to complete this section of the graduate application form, please see the 'Nationality and ordinary residence' sections of the graduate application form and also the Technical Help.

We will use the details you insert in the Qualifications section of the graduate application form to determine your previous education institutions. For further details on how to complete this section of the graduate application form, please see the Qualifications section of the graduate application form and also the Technical Help.

To be eligible for consideration for this scholarship, applicants must be successful in being offered a place on their course after consideration of applications received by the relevant January deadline for the course. Course applications which are held over after the January deadline to be re-evaluated against applications received by the March deadline or course applications which have been put on a waiting list are not eligible for scholarship consideration unless scholarships are still available after the decisions have been made regarding applications received by the January deadline.

College preference

All graduate students at the University of Oxford benefit from membership not only of their department, but also of one of our multi-disciplinary colleges. Applicants may select a preferred college as part of their application or leave the allocation of a college to the University. Applicants are particularly encouraged to consider making Exeter College their preferred college, as this is where the pre-course orientation programme will be held. However, if Exeter College does not accept students for your course, or if you have another college preference, then specifying any other preferred college, or none, will not affect your chances of being offered a place on your course or being awarded a Frost Scholarship.
