

CASyM research exchange grants in Systems Medicine: Step 1 applications opened

CASyM is opening up to 5 exchange grants for research collaborations in systems medicine projects between CASyM partners and associates. The aim is to support research exchange of doctoral and postdoctoral fellows in complementary fields of systems medicine provided by the hosting CASyM institutions. The call is divided in two steps:

In Step 1 CASyM and associated partners who are willing to accept exchange fellows (that work with other CASyM and associated partners) need to apply with a description of a research topic and expertise offered at the host institution. Applications will be evaluated and ranked by the CASyM WP2 ([more](#)) working group.

In Step 2 exchange fellows will apply for the opened positions at hosting partners. The CASyM WP2 working group will evaluate the applications and, with the aid of mentors, make a priority list for each opened position.

The maximum grant coverage will depend on the hosting country but cannot exceed 5000 €. The envisioned exchange period is 1-3 months between *1 June 2015 - 1 July 2016*. Eligible expenses are travel, living and lodging. Salary and materials cannot be covered.

Applications for Step 1 should include

- ▶ Name of the receiving/host institution (CASyM or associated partner)
- ▶ Title of the collaborative work
- ▶ Short topic description (max. 1000 words)
- ▶ The preferred background of the fellow
- ▶ The expected duration of the research exchange (1 – 3 months)

Application deadline:

Send your application until 20 February 2015 to:

- ▶ damjana.rozman@mf.uni-lj.si or
- ▶ jure.acimovic@mf.uni-lj.si
